#USE CASES

S C E N A R I O S

TILER

Lay tiles on floors and wall surfaces from approx. 300 square feet, especially if access is difficult or space is limited. Examples: Pedestrian underpasses, car dealerships, sales areas, commercial kitchens, single-family/multi-family houses

Leveling uneven floors to guarantee cavity-free installation. Mix right where you pour the material. The machine follows your every step through the room.

The oneMIX340 scores particularly well when creating a shower base, especially with a quick screed. Small quantity, mixed to perfection, processed immediately on site.

Stairs are dangerous working environments. It's good to have a compact, lightweight mixer like oneMIX 340 that follows you everywhere and helps to level out stairs and steps. Of course, this also applies to laying natural stone slabs.

The oneMIX 340 is an all-rounder that is perfect for renovation work. It is brilliant for renovating bathrooms and particularly small toilets. Underfloor heating is quickly retrofitted and a new flowing screed laid. The mixer is right next to everything.

Sealing (cementitious) is an extremely critical issue, especially in terms of warranty. How good that you can blindly rely on your Mix-Buddy oneMIX 340.

Where can you find small-format tiles and an extremely high proportion of joints? Exactly, in swimming pools. While you grout, the oneMIX 340 mixes tirelessly. And the best thing is: it's right down there with you, even in the non-swimmer area.

Laying design floors has to be done in one fell swoop. Only if the oneMIX 340 mixes exactly where you need to pour the material you profit from short transportation routes. Plus pouring is a pleasure with the handy mixTUB 34L.

Quickly pour a drain in a commercial kitchen? Thanks to the compact dimensions of our oneMIX 340, the kitchen furnishings can stay where they are.

#BEST PRACTICES

S C E N A R I O S

PLASTERER

Installing thermal insulation on a façade is much quicker if the reinforcing adhesive finds its way to you on the scaffolding as quickly as possible. The mixTUB 34L in the oneMIX 340 is just the right size for this and is not too heavy when fully loaded.

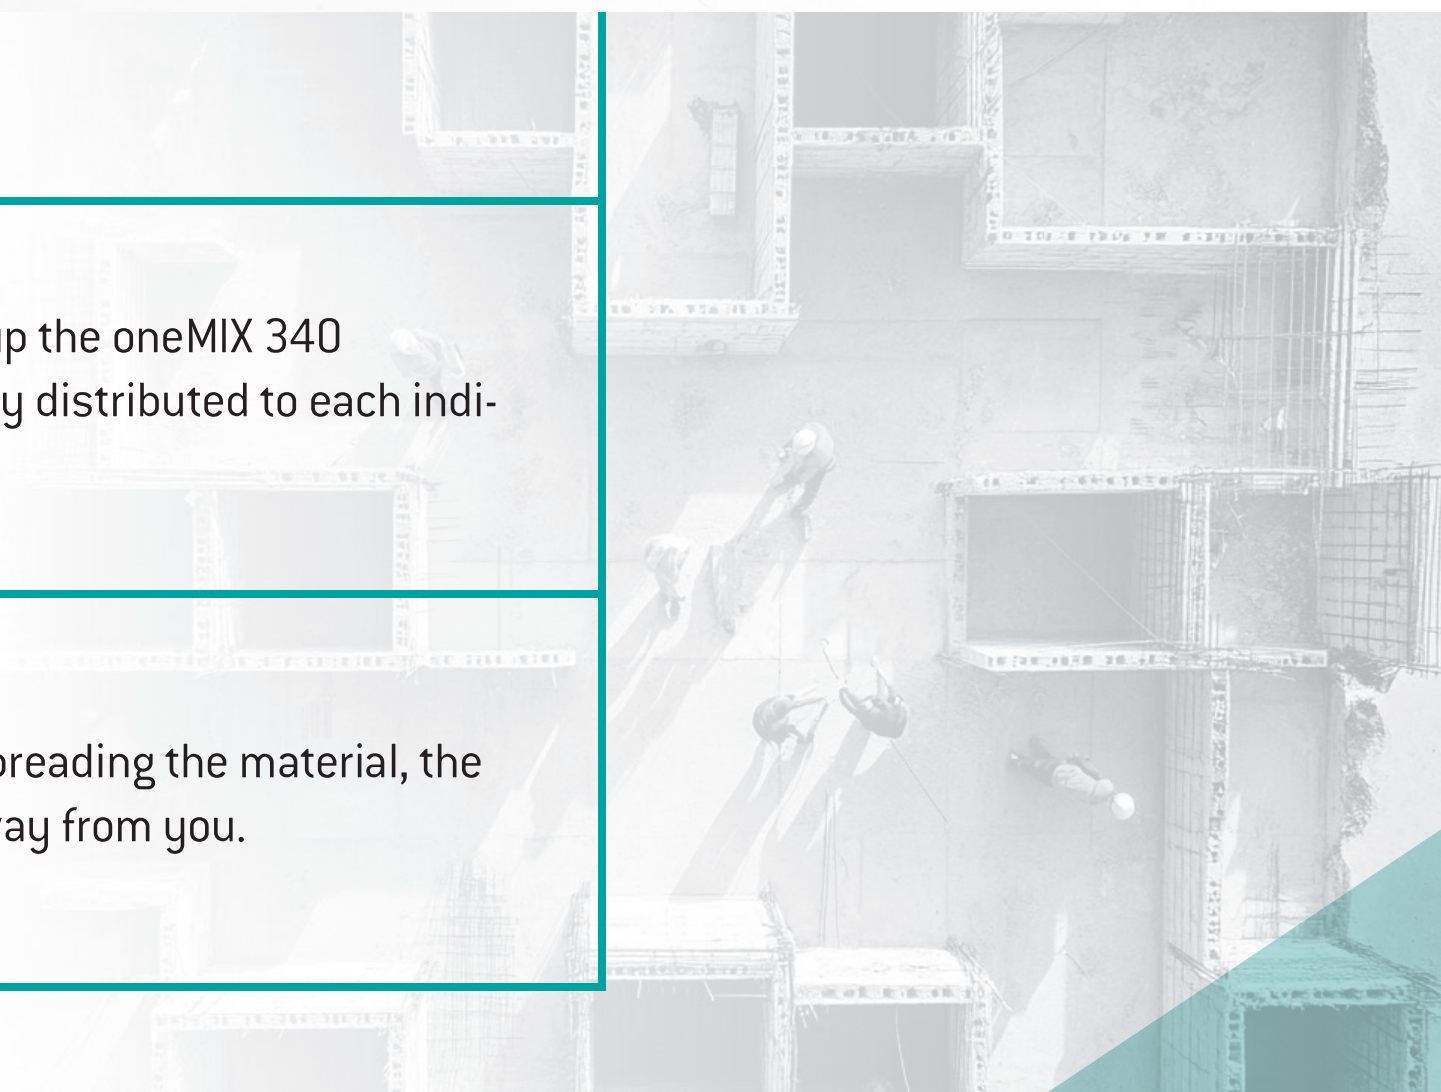

You are constantly on the move when attaching reinforcing mesh. How good that the oneMIX 340 mixes reliably while you work. It also follows you wherever you go.

S C E N A R I O S

BRICKLAYER

When many bricklayers are working on a building shell, it's like a hive of bees everywhere. Set up the oneMIX 340 centrally and let it do one mix after another. With the mixTUB 34L bucket, the batches are quickly distributed to each individual location. Even if you have to lift the bucket overhead onto a work platform.

When applying mortar for the first row of bricks, you can really go the distance. While you are spreading the material, the oneMIX 340 is already mixing the next batch. Trailed behind you, it is always an arm's length away from you.

**SELF EMPLOYED
SOLO CRAFTSMAN**

GENERALIST

**YOUNG TRAINED
PROFESSIONAL**

Space is almost always an issue. Both in the car and often on the construction site.

For me, it makes no sense to have a separate machine for each application. The equipment I invest in has to be versatile.

When you work alone, you need equipment that you can move from A to B on your own without having to worry about your back.

I can't afford to permanently employ a second person as a helper for a job that isn't paid.

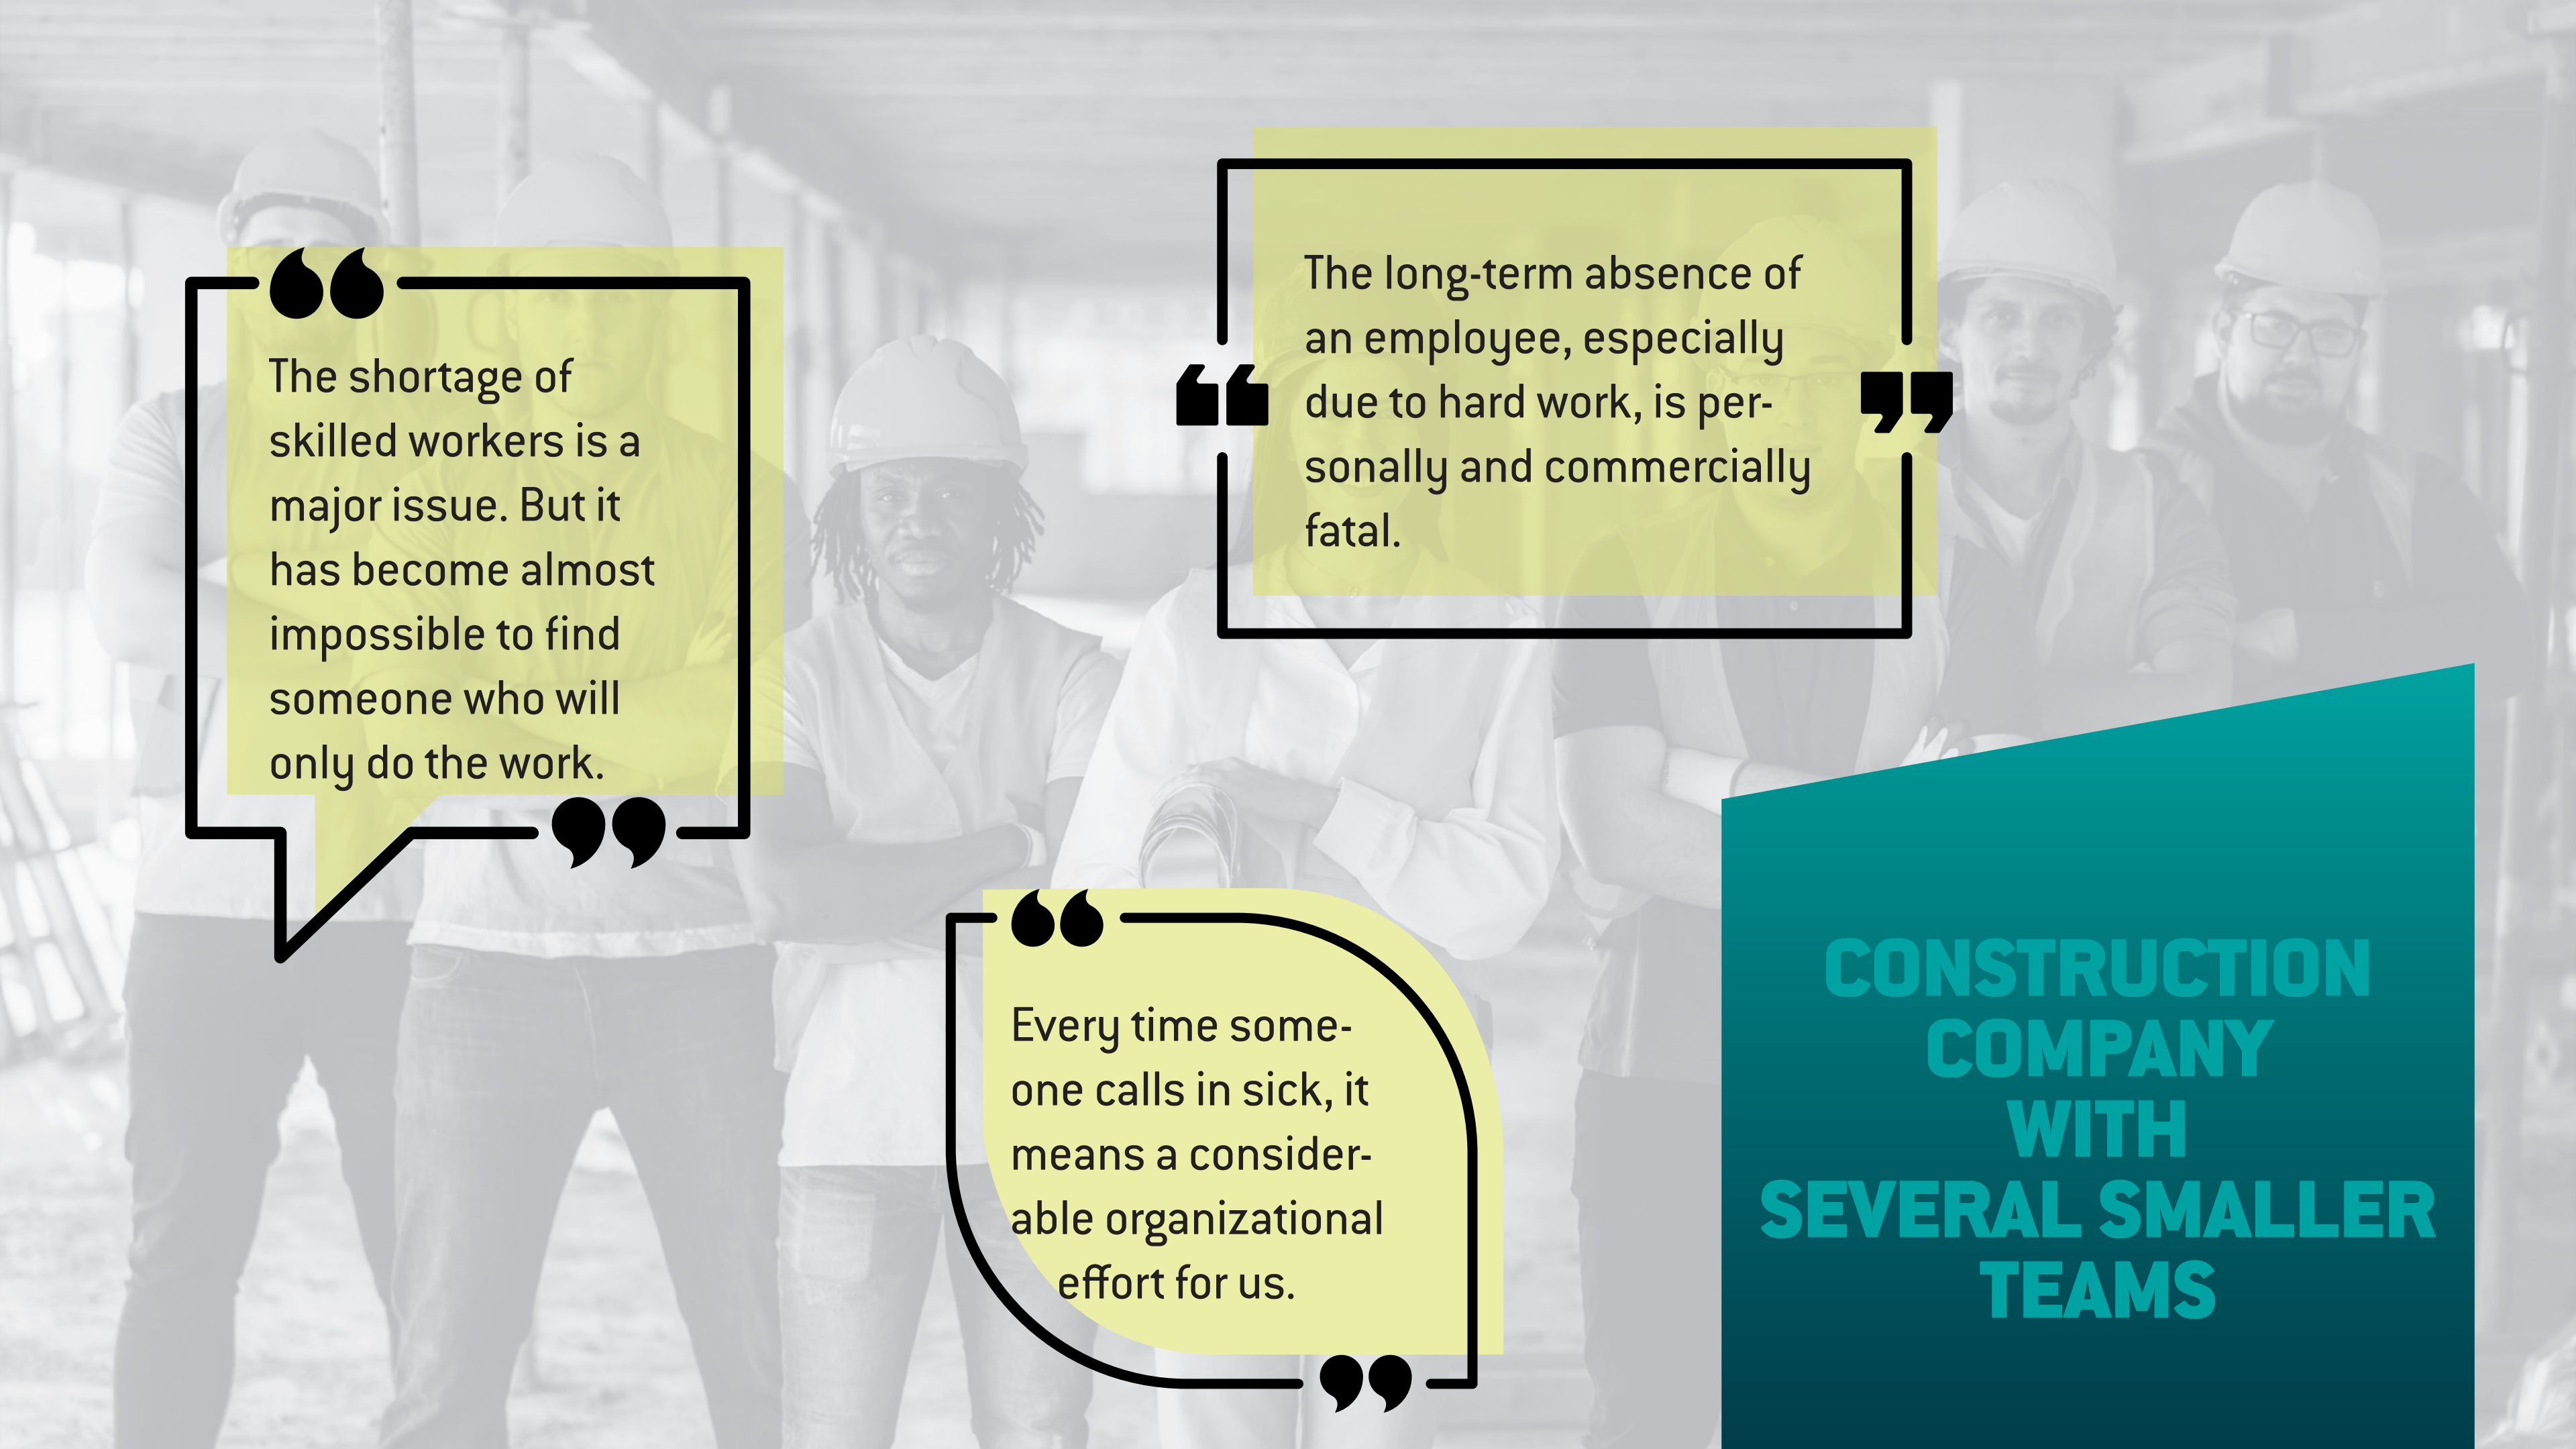

»I don't have room in my truck for a large machine, nor can I lift an automatic mixer all by myself. The oneMIX 340 is different. It follows me anywhere.«

Jasmine De Santis, 31, Decorative Plasterer

»As a tiler, you're almost a generalist these days. The oneMIX 340 is the first machine that fulfills 100% of my needs as a solo worker.«

Benjamin Schrader, 34, Tiler

The shortage of skilled workers is a major issue. But it has become almost impossible to find someone who will only do the work.

The long-term absence of an employee, especially due to hard work, is personally and commercially fatal.

Every time someone calls in sick, it means a considerable organizational effort for us.

WHY oneMIX³⁴⁰

FOR RETAIL

STRATEGIC VALUE

- » Bridging the gap between Collomixers and automatic mixers
- » Exceptionally broad target group, especially for a Collomatic machine
- » Out of sight, out of mind: decades of proven Collomix quality (<1% claim rate for Xo-series)
- » Comparatively inexpensive for the user to purchase
- » Attractive margins

WHY oneMIX³⁴⁰

FOR RETAIL

MARKETING SUPPORT

- » Large-scale, cross-channel campaign for the product launch, incl. sales promotion
- » Even after that: Intensive sales support
- » Fewer questions and uncertainties for your customer thanks to our Getting Started video guide
- » Perfect integration into our impressive “modular stand” POS system

WHY
OneMIX³⁴⁰

FOR RETAIL

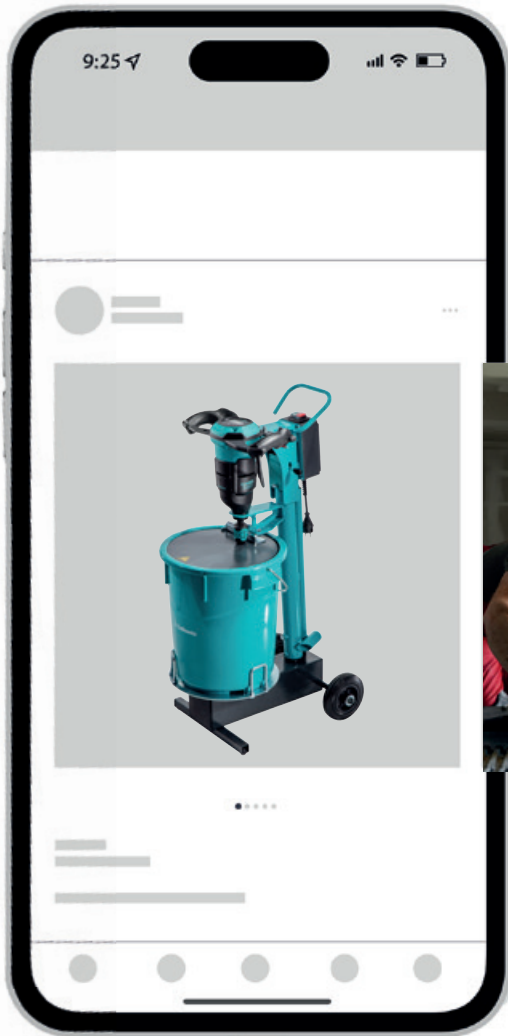

AFTERSALES
SUPPORT

- » Exceptional manufacturer service level for your support: Practical advice from experts in the field
- » Excellence in aftersales: Long-term availability of spare parts, at least 7 years
- » We take the work off your hands: In-house repair service in Gaimersheim, Germany
